## Olive

We created our recipe by taking advantage of the olive's miracle.

## Pomace

The journey begins with grinding the olive pomace to an acceptable particle size

## Solvent-Free

To protect nature and life, solvent haven't been used in the patented formula we developed.

## Affordable

More budget-friendly compared to similar products in the market.

## Recyclable

Created from plant- based waste and recycled materials. Oleatex itself can also be recycled!

## THE FASHION PACT Fashionable

Supporting all 3 criteria of The Fashion Pact, Oleatex can be produced in large quantities.

## Resistant

As durable as real and artificial leather. In addition, requested performance features can also be added.

## Eco-Friendly

Reducing carbon footprint more than six times, No water usage. All bio-wastes are locally sourced. The whole process takes place within a radius of 100 km

## Coating

Depending on the application area, it can be applied at required thickness, pattern, and color.
