### Olive

We created our recipe by taking advantage of the olive's miracle.

### Pomace

The journey begins with grinding the olive pomace to an acceptable particle size

### Solvent-Free

To protect nature and life, solvent haven't been used in the patented formula we developed.

### Affordable

More budget-friendly compared to similar products in the market.

### Recyclable

Created from plant- based waste and recycled materials. Oleatex itself can also be recycled!

### THE FASHION PACT Fashionable

Supporting all 3 criteria of The Fashion Pact, Oleatex can be produced in large quantities.

### Resistant

As durable as real and artificial leather. In addition, requested performance features can also be added.

### Eco-Friendly

Reducing carbon footprint more than six times, No water usage. All bio-wastes are locally sourced. The whole process takes place within a radius of 100 km

### Coating

Depending on the application area, it can be applied at required thickness, pattern, and color.
